

New Design of Sun-Flower

Dear customers, glad to inform you that our new Sun-flower has produced after many test. As a warning light, Sun-flower gets much more benefits comparing with other warning lights.

Advantages

☆ **More energy saving**

Our Sun-flower can be continue working around 15 days during cloudy or rainy day and 300mm yellow flasher can only keep continuous working for 6 days at the same conditions.

☆ **Cost reduction**

The solar panel and battery cost of our Sun-flower are cheaper; the average shipping fee is down due to the reduced of the carton size and gross weight.

☆ **More easy to installation and maintaining**

Our Sun-flower is much easier to installation and maintaining with the smaller size and exquisite appearance.

We really hope our Sun-flower can give you some new ideas that you are interested. Please contact with us if you have any questions and we are here waiting for you.
